Bagging machine VS320

## OVERVIEW

- The ideal machine for stacked products and flat-packed loaves
- Once the products have been placed on the toothed conveyor belt, they are automatically fed into pre-formed plastic or paper bags. The bags are then clipped shut
- The entire machine is driven by a single motor and a mechanical system that has proven its reliability and durability. Access to the mechanical components via large doors, which also facilitates cleaning
- Options: automatic in-line feeding, self-cleaning vacuum filter, sealing head, clip printing device

## MAIN FEATURES
